PROFILE

Graduated with a 9.61 CGPA in Bachelor of Business Administration (Computer Application) degree from Savitribai Phule Pune University and an additional Data Science Mastery certification course by IIT-Madras Pravartak and GUVI HCL. Equipped with strong foundations in Python, SQL, machine learning, Git/GitHub and data visualization. Experienced with capstone projects involving data pipelines, exploratory data analysis and dashboarding. Eager to contribute to real-world Data Science projects.

SKILLS

Python • SQL • Machine Learning • LLM • RAG • Streamlit • Git/GitHub

PROFESSIONAL EXPERIENCE

Siam Computing, *AI/ML Intern* 04/2026 – 08/2026 | Remote
- Built a unified AI healthcare platform combining clinic appointment booking, medical triage report generation and insurance navigation, with a FastAPI/Python backend integrating Llama LLM via Groq API and Pinecone as the vector database for RAG.
- Managed patient data using MongoDB Atlas and built the frontend using React.

MyDailyWork, *Machine Learning Intern* 02/2026 – 03/2026 | Remote
Created Machine Learning pipelines for a Credit Card Fraud Detection system, a Customer Churn Predictor and a Text generator.

PROJECTS

Food Image Classification, *Key skills: CNN, Transfer Learning, PyTorch* 11/2025 – 12/2025
• Designed a complete computer vision pipeline for **10 class food image** classification using **PyTorch**, including stratified train/ validation splits, image preprocessing, data augmentation, and ImageNet normalization.
• **Fine-tuned pretrained CNNs** (ResNet-50, ResNet-101, EfficientNet-B0) with transfer learning using **AdamW**, cosine learning rate scheduling, mixed precision training, and macro F1-score based checkpointing, achieving ~**0.94** macro F1 on the test set using the **ResNet-101** model.
• **Evaluated, interpreted, and deployed** the model using **confusion matrices** and **Grad-CAM** visualizations, and exported the best model via **TorchScript** with an inference script.

Aerial Object Classification, *Key Skills: CNN, PyTorch, Streamlit* 10/2025 – 11/2025
- Built an end-to-end **binary image** classification system (Bird vs Drone) using **Custom CNN** and **EfficientNetB0** (Transfer Learning) with TensorFlow/ Keras.
- Implemented data preprocessing, augmentation, class-imbalance handling, fine-tuning, and model evaluation using accuracy, precision, recall, F1-score, and confusion matrix.
- Achieved **~98.6%** test accuracy through **EfficientNetB0** fine-tuning and robust evaluation on unseen aerial images. Deployed a Streamlit web application for real-time inference with confidence scores; version-controlled on GitHub and cloud-deployed.

Nutrition Paradox: A Global View on Nutrition, *Key Skills: ETL, SQL, PowerBI* 08/2025 – 09/2025
• Performed **end-to-end ETL**, data cleaning, and feature engineering on WHO nutrition datasets using Python to analyze obesity and malnutrition trends across countries, age groups, and regions.
• Built a **SQLite** analytical database and executed **25+ SQL queries** to identify temporal trends, demographic disparities, and data reliability using confidence intervals. Developed Power BI dashboards to visualize insights.

EDUCATION

IIT-M GUVI HCL, *Advanced Programming Professional & Data Science Mastery* 05/2025 – 12/2025 | Nashik

Savitribai Phule Pune University, *Ashoka Center for Business and Computer Studies, Bachelor of Business Administration with Computer Application (BBA(CA))* 07/2022 – 06/2025 | Nashik
CGPA: 9.61

CERTIFICATES

- GUVI HCL: Artificial Intelligence
- Cognifront: IoT using Arduino
- Imperial College's Mathematics for Machine Learning: Multivariate Calculus
- MSME (PPDC) AI & ML
- VIOSA: Corporate Mentorship Program
- Imperial College's Mathematics for Machine Learning: Linear Algebra

LEADERSHIP & INTERESTS

- **Founder**, "It's Part of Racing" (competitive go-karting community, members from multiple Indian cities).
- **3x** Rental Go-Karting Champion, **2x** Team Endurance Champion.
- College Class Representative and Elite Club member for 2 consecutive years.
